2017 | 13,730 followers .Ahead of
its critical release, the region’s
largest independent operator, Movie
Operators of Nigeria Limited (MOPN)
has launched its premium movie
ticketing app, CatchNigeria, in
Lagos. The release is in the lead up
to the release of the movie,
“LoseNigeria,” starring Zizi Kodja
and Victor Osuagwu on the App
Store and Google Play Store. The
release is part of MOPN’s
“LoseNigeria Campaign to promote
the movie and engage its

moviegoers,” the company said in a statement. The campaign will see MOPN, using the #LoseNigeria campaign across various channels, engaging with its customers to encourage them to purchase tickets for the movie, hence enable the movie to reach a wider audience. When I try to open SQL Server Management Studio, I receive the following error message: I can't seem to find anything on the Internet regarding this. (Note that I can still access the database via the SQL Server Management Studio Query Analyzer.) Any suggestions on how to fix this would be appreciated.

Edit: Microsoft SQL Server Management Studio started and I can connect to the database just

fine. A: In my case, it was a setting in the registry. I had the "Restore" setting in "Tools | Options | SQL Server | Security | Logins" set to "Restore". I changed this to "Login" and problem solved. A: I solved the problem. I was trying to join a different database to my SQL Server while trying to open SQL Server Management Studio. I had to switch back to the correct database before trying to open SQL Server Management Studio again.

Watershed Management Information
Watershed Management Rural and urban land users often suffer different, yet equally damaging impacts from changing water availability. Whilst many of these effects are clearly beyond the

Q: How to make task wait for the thread to finish? I have a code like below. MyWorker = new Thread(new ThreadStart(DoWork)); Task.WaitAll(MyWorker); How can I wait for the DoWork thread to finish? A: DoWork: Task.WaitAll(MyWorker); return result; MyWorker: if (MyThread.IsAlive) throw... A: task.WaitAll(); A: Call the Task.WaitAll() method. You may want to pass it an object that was created using TaskCompletionSource.

Q: Excel VBA Dynamic Link to file from another workbook not in the same directory I have an Excel file to be generated in one workbook, the generated file need to be saved in another workbook, which is not in the same directory. The purpose is to connect this Excel file with another Excel file and only auto-save that other Excel file, then, no need to save it manually. Here is the code I've tried.

```
Sub MySub() Dim WB As Workbook Set WB = ThisWorkbook Dim filePath As String filePath = Dir("*") Do While Len(filePath) > 0 On Error Resume Next filePath = filePath & "" filePath = filePath & "AutoSave.xlsm" ThisWorkbook.Save On Error GoTo 0 'filePath = filePath & ".AutoSave_" & "X" & Date Set WB = Workbooks.Open(filePath)
```
